2009 TRAINING SCHEDULE

FORKLIFT OPERATOR COURSES

THE PROFESSIONALS

THE PROFESSIONALS

THE PROFESSIONALS

is a comprehensive program designed by factory trained professional instructors to exceed many aspects of the new **OSHA** regulation. The course is not only designed to increase safety, but also productivity, decrease product damage and reduce your material handling equipment maintenance cost. Safe operating procedures are stressed throughout all of our courses.

We have regularly scheduled courses at our dedicated training facility. **We can also tailor courses at your location to meet your specific needs.**

The scheduled courses cover class 1-7 powered industrial trucks. The new **OSHA** regulation requires training programs to have: Formal instruction, practical training and an evaluation of the operators performance in the workplace. The scheduled courses at our facility, of course, do not include an evaluation of your operators at your workplace. We can schedule an operator evaluation at your facility if you do not have a **qualified trainer** to perform this task to complete compliance of all parts of the new **OSHA** regulation. The Operator qualification is required a minimum of **every three years**.
